

About Us :

Periclave is an ISO 9001 : 2008 and CE Certified manufacturing company. The owner is the third generation of a 65 years old Industrial family with over 20 years of personal experience in successfully introducing new technologies for Laundry equipments which was never seen and heard of in the Country. We at Periclave strive to deliver our best using the Best Available Technologies & Man Power.

Our Taskforce :

At Periclave, we have a team of over 100 personnel's with over 25 service engineers to give our customers 100 % satisfaction both pre sale and post sale .

Our Strengths- For projects :

- Providing comprehensive solutions for CSSD & Laundry under one roof

- Project Layout
- Detailed installation plan, foundation drawings, electrical wiring diagrams etc.,
- Our scope of supply also includes documentation like MoC test certificates, calibration certificates, Test worthiness, training and demonstration to the users etc., which are must for NABH , UFDA and JCI certification
- Submission of weekly schedules on updates
- We provide Annual maintenance contract

Our strengths – For equipments:

- Branded Material/Components
- Fabrication by workers trained for ASME requirement .
- Easy replaceable and locally available components
- Easy to understand and convenient to operate
- Color /Number code identification on wiring
- Energy saving design

What else we make for Laundry

"Due to our constant effort for improvement our design and specification will change without prior notice."

Sluicing Machine

Also Known as Barrier Washer Extractor . The machine is used to remove stains of blood, faeces from used linen. The unit has a Double Door design, one in the front for loading of dirty linen and other on opposite side for unloading of washed/clean linen. This facilitates to have barrier wall. The inner/outer drum and outer paneling is of SS with heavy duty steel frame. With Single motor for both 'WASH' & 'EXTRACTION' Cycle through VFD. Optional control by microprocessor/PLC is also available

Capacities offered for Dry linen weight : 7, 15, 25, 35 & 50 kg.

Hydro-Extractor

This machine is used to remove water from linen after the wash cycle . It has Three point suspension design, entire assembly of Inner SS basket , Outer SS basket & Drive suspended to minimize vibration. Optional control by microprocessor/PLC is available

Capacity offered : 7, 15, 25, 35, 50 & 75kg

Side Loading Washing Machine

This machine is used to wash linen . This is the most robust design as the open pocket washing drum is supported on both ends . Steam / electric or combined or thermic fluid or gas heating is offered. The inner/outer drum and outer paneling is of SS with heavy duty steel frame . Auto reverse digital timer, Temperature indicator , Large drain valve ensures faster drain, Complete Stainless Steel ball valve for Water inlet. Optional control by microprocessor/PLC is also available .

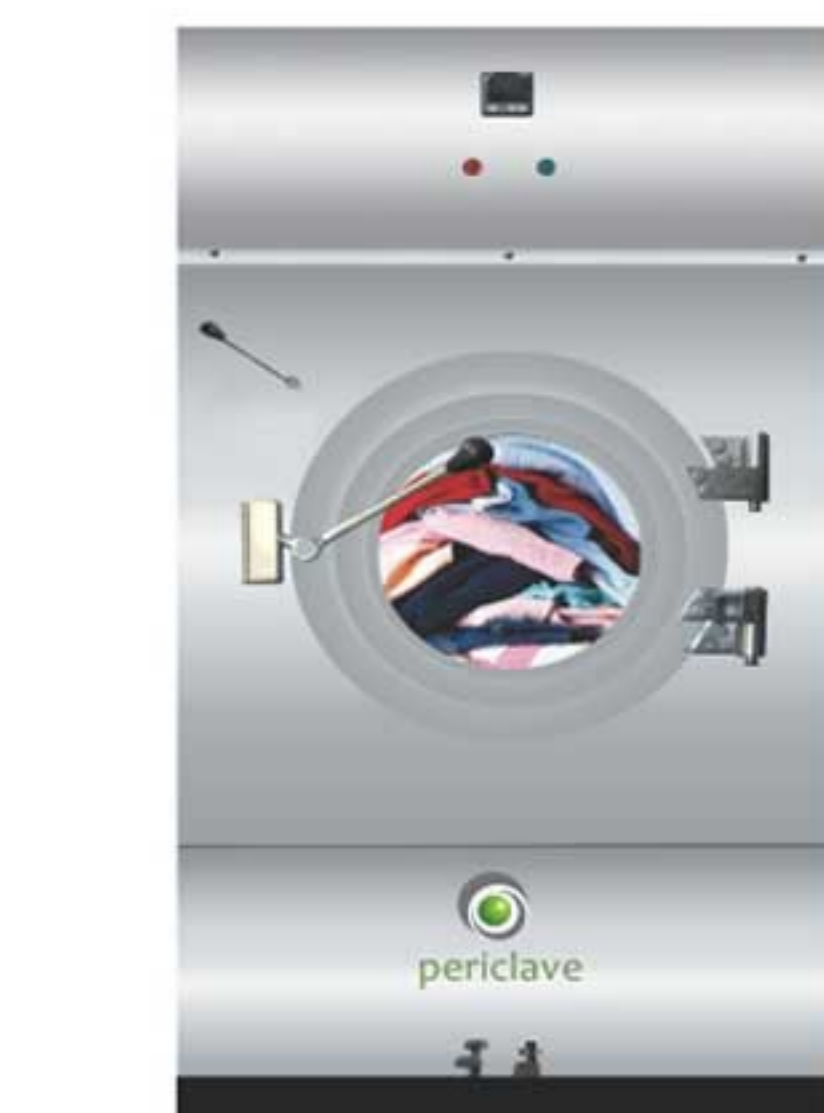

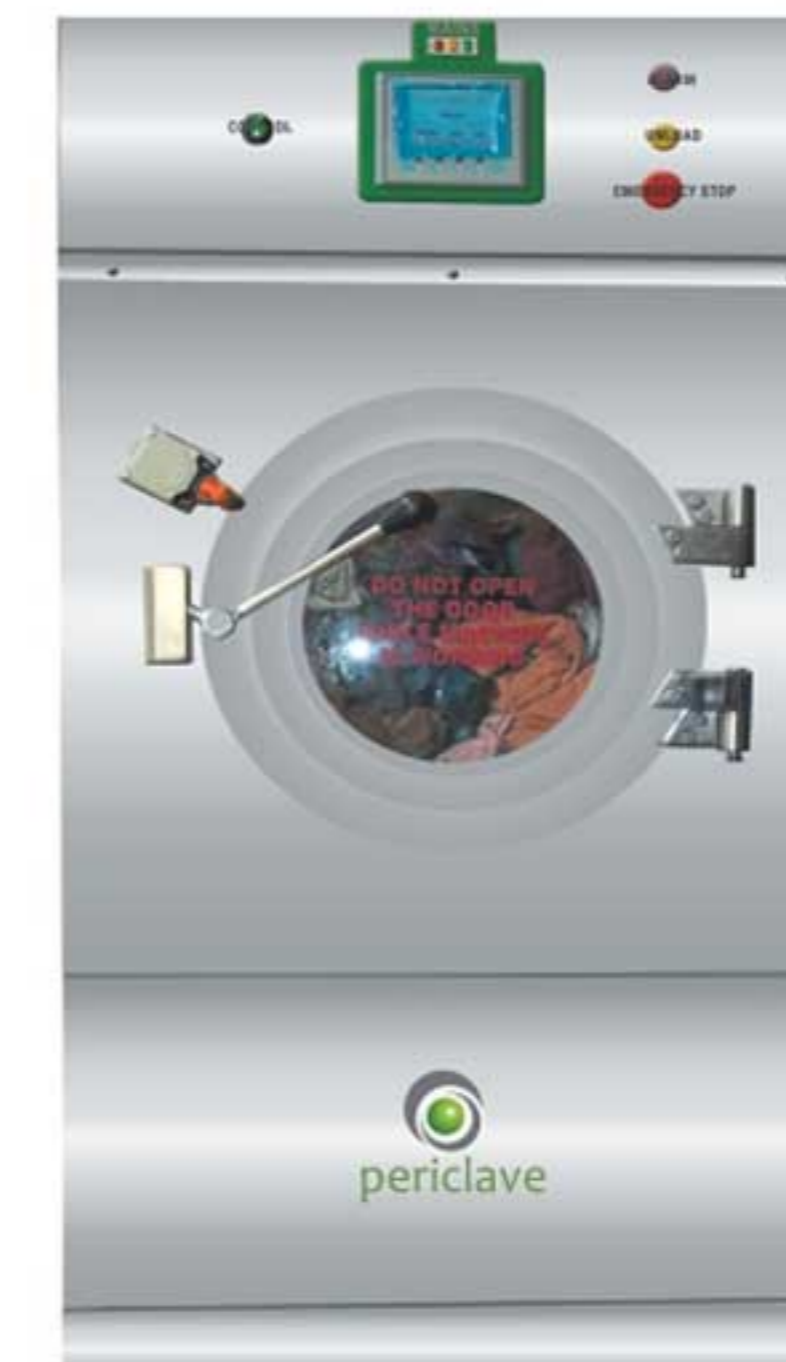

Capacities offered for Dry linen weight : 7, 15, 25, 35, 50, 75, 100, 150 & 200 kg.

Washer Extractor

This machine is a combination of washing machine and hydro- extractor . Rigid and suspended type design are offered for steam / electric or combined or thermic fluid heating. The design is with Open pocket drum. The wash with auto reverse cycle and extraction cycle is achieved by a VFD through a single motor. The inner/outer basket is of SS with steel frame duly protected against corrosion. Optional control by microprocessor/PLC is available .

Capacities offered for Dry linen weight : 7, 15, 25, 35, 50, 75 & 100 kg.

Front Loading Washing Machine

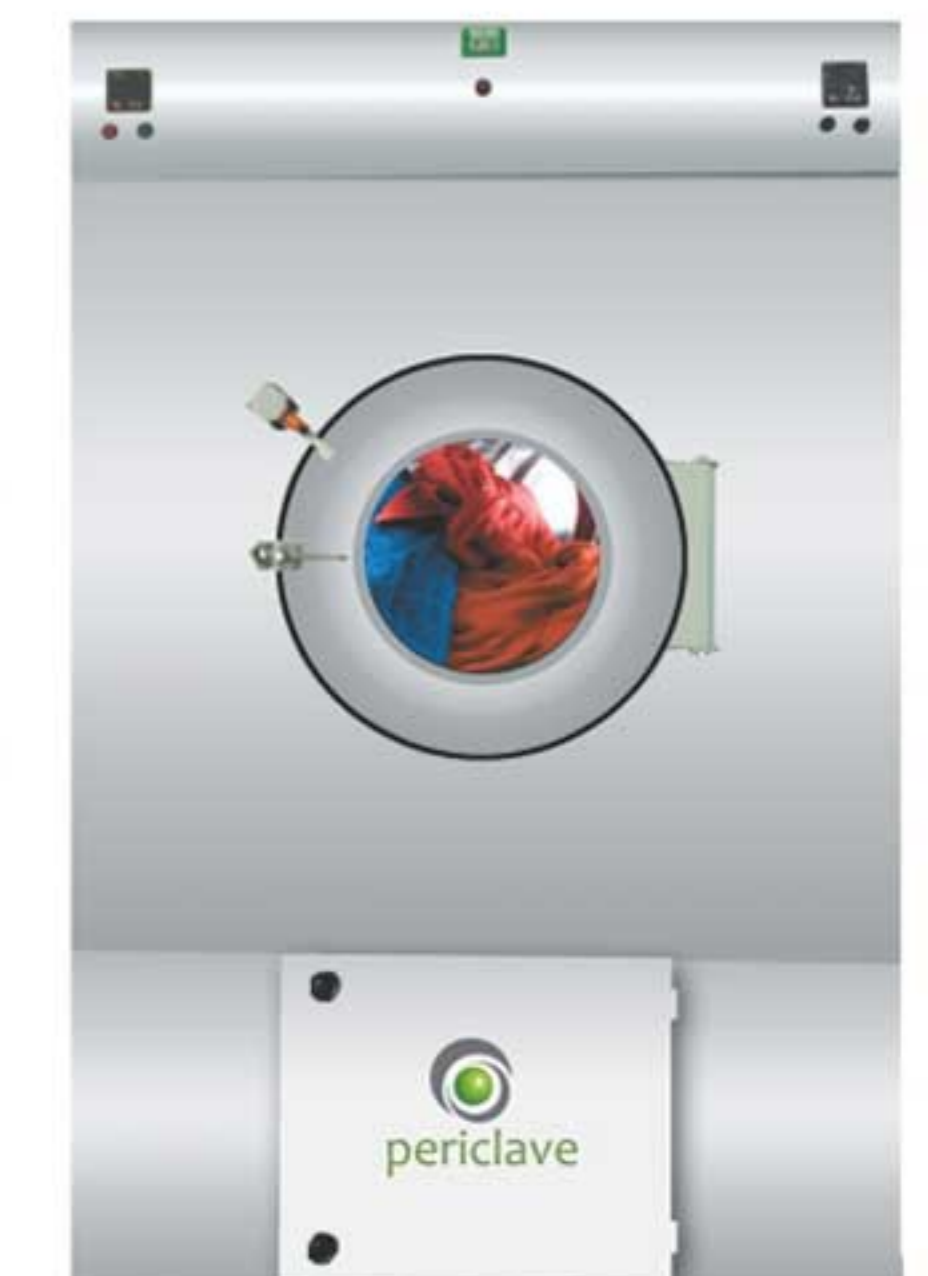

This machine is used to wash linen . This design is recommended when space available is less. The inner/outer basket is of SS with steel frame duly protected against corrosion. Steam/electric or combined or thermic fluid or gas heating is offered. Open pocket, Double sealing on the door, Auto reverse Electronic timer, Temperature indicator , Large drain valve ensures faster drain, Complete Stainless Steel ball valve for Water inlet. Optional control by microprocessor/PLC is also available .

Capacities offered for Dry linen weight : 7, 15, 25, 35, 50, 75 & 100 kg.

Dryer

This machine is used to completely dry linen after Hydro-Extractor /Washer Extractor process . It has a front loading robust design. Inside basket is made of stainless steel. Steam/electric or combined or thermic fluid heating is offered. Self cleaning lint screen, Auto reverse & auto stop by digital timer, Electrical interlocking of door for drive and Dynamically balanced aluminum impeller fan directly mounted on motor shaft. Optional control by microprocessor/PLC is available

Capacities offered for Dry linen weight : 7, 15, 25, 35, 50, 75 & 100 kg

Flat Work Ironer or Calender

This machine is used to completely dry and iron flat linen after Hydro-Extractor /Washer Extractor process. The ironers are available with single or multiple rolls & can have 2 fixed or variable speeds with single motor controlled by VFD. Rolls are padded with multi layers of Stainless Steel(S.S.) Wool. Lifting is either pneumatic or manual. Steam, electric or thermic fluid heating is offered.

Roll Size offered : 375 mm & 610mm diameter & Length of 1830mm, 2500 mm & 3050 mm

Flat Bed Press

Pneumatic Presses :

These Machines are used to iron linen . Heating on both HEAD (Top plate) & BUCK (Bottom plate) , Head plate of Stainless Steel , Both Head & Buck are insulated & covered with powder coated panels, the structure and all panels are of steel. The lowering of head is pneumatic with auto opening. Steam, electric or thermic fluid heating is offered.

Offered Design : Flat Bed Press, Legger Press , Bossom & Body Press, Cuff & Collar Press , Shoulder Press & Mushroom Press (All the Press are also offered with Vaccum and other arrangement for Dry Cleaned Garments.) We Are The Only Indian Manufacturer Covering Full Range Of Presses.

Size offered for Flat Bed Press : 915mm x 460mm , 1370 mm x 610 mm and 1500 x 750 mm .
